NACHTHAPHONG SAENGBUT

Full-stack Developer

134nk.dev@gmail.com

PROFILE

Full-stack developer with professional experience at I&I Group (iiG, 2022–2025), delivering enterprise web solutions and business workflows. Proven track record as a solo developer, independently architecting, designing, and engineering full-stack commercial products from scratch—including restaurant QR ordering and SaaS rental platforms using Next.js, React, TypeScript, Python, and PostgreSQL.

TECHNICAL SKILLS

- **Web Development:** React, Next.js, TypeScript, Tailwind CSS; previous experience with Angular.
- **Backend & Database:** Node.js/Hono, Python/FastAPI, Java, PostgreSQL, Supabase; previous project experience with Django and MongoDB.
- **Go:** Familiarity through API using Gin and pgx/PostgreSQL.
- **Integrations & Tools:** LINE Messaging API/LIFF, Git, Docker, Vercel.
- **EA Development:** MQL5/MetaTrader 5, implementing self-defined trading rules; basic trading and market-structure knowledge.
- **Additional Exposure:** Python data-processing tools and basic Dart/Flutter app setup.

WORKING SKILLS

Independent project development, translating business workflows into application logic, frontend/backend integration, API and database work, debugging, and deployment tooling.

PROFESSIONAL EXPERIENCE

I&I Group Public Company Limited (iiG) – Developer
18 July 2022 – 31 August 2025
• Engineered end-to-end enterprise web solutions, delivering full-stack features across frontend interfaces, backend services, and database layers.
• Built responsive, component-driven user interfaces using modern JavaScript and Lightning Web Components (LWC).
• Implemented core business logic, event-driven workflows, and asynchronous background processing using enterprise OOP patterns (Apex).
• Designed and integrated custom REST and SOAP APIs to establish seamless communication with external third-party systems.
• Architected relational data models, optimized complex database queries for high performance, and managed codebase through Git workflows and code reviews.

SELECTED PROJECTS

Solo projects developed for commercial use; source repositories are private.
QuinR-rai – Restaurant Ordering · Role: Solo Developer (End-to-End)
React · TypeScript · Hono · Supabase/PostgreSQL · Vite
Independently conceptualized, designed, and developed an end-to-end QR ordering platform from scratch, featuring dynamic customer table-ordering, takeaway workflows, and a merchant management dashboard. Project includes backend order and payment handling, table sessions, and automated tests.

Rental & Retail Platforms – Flowly / 134nk-SaSS · Role: Solo Developer
Next.js · TypeScript · Hono · FastAPI · PostgreSQL
Independently built a modular rental and retail management platform handling inventory, booking schedules, customer records, and integrated PromptPay QR / LINE messaging workflows.

MetaTrader 5 Development & Automation
MQL5 · Python · FastAPI · MetaTrader 5
- Designed trading rules and developed MQL5 Expert Advisors for entry/exit, per-trade sizing, trade management, execution, and logging.
- Worked with supporting tools for EA compilation/deployment, market-data export, and journal retrieval.

AWARDS

Honorable Mention – 23rd National Software Contest (NSC 2021)
Project stack: Python · Django · MongoDB (NoSQL)
19 March 2021 · University-level category: Software for Science and Technology Development
- Recognized as a project developer for "Design and Development of Phishing Website Detection Using Machine Learning" at Udon Thani Rajabhat University.

EDUCATION

Udon Thani Rajabhat University
Field of study: Information Technology (IT).
